We're Passionate About Pallets™

What you get with every PECO pallet

HIGH QUALITY PALLETS

- ▶ Sturdy wood block construction for proven long-term durability
- ▶ Safe to use in overhead racks and won't slip in refrigerated areas
- ▶ Cleaned, sorted and inspected before being reissued
- ▶ Repaired to exacting standards, not to an arbitrary damage rate
- ▶ Never used to transport industrial products or hazardous materials

RESPONSIVE SERVICE

- ▶ Guaranteed delivery within 72 hours (or 5 days for heat-treated pallets)
- ▶ Service team with years of logistics experience and expertise
- ▶ Regular onsite visits and training by service representatives
- ▶ Convenient 24/7 access with RED<>LINK™ online inventory management
- ▶ Seamless integration with existing EDI systems

OVERALL VALUE

- ▶ Pallets kept in secure loop to limit loss and damage
- ▶ Fair, honest pricing with no surprises on invoice

SUPERIOR TECHNICAL FEATURES

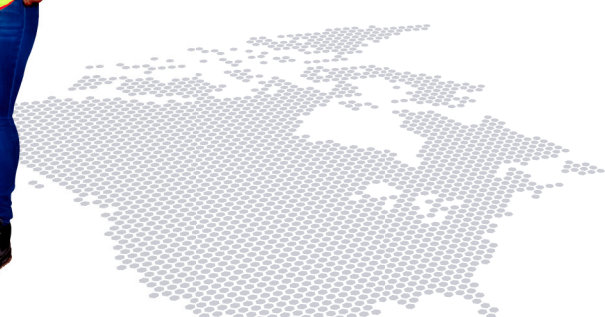

- ▶ State-of-the-art high-tech pallet construction
- ▶ GMA (48"x40") and half pallet (48"x20") sizes available
- ▶ Lowest total lifecycle cost per pallet
- ▶ Full-size pallets rated at 2,800 lb (1,270 kg) load capacity
- ▶ Half pallets rated at 1,400 lb (635 kg) load capacity
- ▶ Test-certified performance: ISO, FDA, USDA, ASTM, ISPM-15
- ▶ Pallets can be heat treated to comply with ISPM-15 phytosanitary standards (available at an extra charge; allow 5 days for delivery)

HONESTY AND INTEGRITY

- ▶ Dedicated high-caliber executive management team
- ▶ Strong relationships with top North American retailers and distributors
- ▶ Over 25 years in business with proven economic model
- ▶ Passionate commitment to providing best quality and service in the industry

ENVIRONMENTAL SUSTAINABILITY

- ▶ Wood is all-natural, fully recyclable, and biodegradable
- ▶ No chemical treatments or hazardous materials
- ▶ Pallet loads shipped by rail whenever possible
- ▶ Responsibly forested timber

PECO Pallet's North American Service Network

At PECO Pallet (PECO), we don't just move pallets—we help move the supply chain forward. As one of North America's leading pallet pooling providers, we're known for our red pallets, our reliable service, and our vast network of depots, recovery locations, and service points across the U.S., Canada, and Mexico.

- PECO Depot
- Manufacturing

In addition to the locations shown here, PECO Pallet's extensive service network includes pallet recovery, sort and storage locations, including some renter and distributor sites. This enables PECO to provide **100% coverage** across the United States, Canada, and Mexico.

Updated April 2026. Subject to change.

PECO's core values are built into every pallet

Quality

At PECO Pallet, quality is at the core of our company. We start by manufacturing sturdy wood block pallets, and we maintain the quality of our pallet pool by rigorously inspecting, sorting, cleaning and repairing pallets each time they cycle through a PECO depot.

Service

PECO Pallet's responsive customer service is what truly distinguishes us from the competition. We have strong working relationships with all of our customers, including many of North America's leading manufacturers and retailers.

Safety

PECO Pallet is committed to ensuring the safety of products and people. Because our sturdy block pallets are carefully maintained and repaired, they work smoothly in automated processing lines and can be safely stacked in high-reaching overhead racks.

Sustainability

PECO Pallet was founded on the basic principle of reusing pallets to conserve resources. Our pallets are built from responsibly forested timber and are continually repaired, reused and recycled.

Simplicity

Customers who have partnered with PECO Pallet find we make their jobs much easier. We reliably deliver high-quality pallets when and where our customers need them, and our simplified pricing is straightforward and easy to understand.

Control

PECO Pallet saves our customers time and money by carefully controlling pallets within the secure loop of our North American network. This limits pallet loss and damage, keeps costs low, and enables us to quickly get high-quality pallets back into the rental pool.

PECO makes pallet management simple

RED<>LINK™, PECO's web-based pallet management tool, allows users to log in from anywhere 24 hours a day to place orders, check delivery dates, view invoices, enter transactions, or track pallet flows. All transactions are updated in real time to ensure that data is reliable and accurate.

The RED<>LINK™ interface is simple to use. But don't be fooled: there is a huge amount of information beneath the surface, and it's all accessible to users.

At PECO Pallet, we believe in sharing information openly. Using RED<>LINK™, our customers can generate many useful "at-a-glance" reports that show detailed information about transactions at each location.

Nobody wants to spend time keeping track of pallets, so PECO makes it easy to automate inventory systems. Many renters set up recurring orders to ensure a regular supply of PECO pallets. Our systems integrate seamlessly with EDI to place orders and report transfers.

PECO Pallet is a North American leader in pallet rental services and logistics. PECO's red wood block pallets are used by market leaders in the CPG industry and are accepted at top grocery, club and discount retailers across North America.

PECO provides high quality pallets, responsive service, and innovative solutions to help customers achieve significant long-term savings throughout the supply chain.

Based in Itasca, Illinois, PECO Pallet maintains over 2,900 full-service depots, sort and recovery locations and manufacturing facilities throughout the U.S., Canada and Mexico.
